

The Product means someone Made It.

She was loved by her maker and her buyer.

You're Going to Make it. ¹²

Industrial Design or Product Design is often a cope, a subservience to things like markets, shareholders and clients.

It is beautiful to me when a product occurs, fully realized, packaged and a labor of love. It signals to me that there is a place in the market for an auteur, or a lover. The market is something we're told to think of as this big scary Maw, that's cope.

You can find a place to market your dreams and loves, and its not selling out. There will always be a market somewhere made up of the people who believe in love like you. It becomes crystalized, it gets released, it gets brought, it gets kept and sold. Your Product-Arts or Art-Products can integrate into lives, be speculated upon.

Don't you love her More knowing she was invested in, the upfront costs gathered?

Her Moe-elements were selected by her maker, they had to be justified to investors, the creative had to believe and make others believe. "No Sir, you don't understand, We have to keep the band-aids on her knees, she must look left. We cannot cut these corners" Its Romantic i think, you have to sell ³ love to yourself, others and to the one you love. You bring her home to meet your parents, gain their blessing. Marry.

Chise from "Saikano: The Last Love Song on This Little Planet" or "She: The Ultimate Weapon"

- 1 You're going to make something.
- 2 You're going to succeed.
- 3 Believe in, Invest in, Be willing to work for.
